User Guide for Hi-Fi Prototype

The Hi-Fi Prototype consists of three parts:

➢ Part I: Exploring Main Page (Total 9 features)
➢ Part II: Discovering Detail View Page (Total 7 features)
➢ Part III: Uncovering Other Pages: Progress Page and Account Panel (Total 5 features)

The following items **do not belong** to the Hi-fi prototype interface. However, they are still crucial to the user's understanding the Hi-Fi prototype.

: The yellow arrow that blinks for 3-5 seconds to indicate the user where to click to observe how a specific feature works.

Press Space Bar on your keyboard.

: The grey rectangle that blinks for 3-5 seconds to prompt the user to tap spacebar to proceed. Typically, the space bar has to be tapped **once or twice** to be effective.

: The yellow rectangle that shows all the annotations

or instructions that help the user understand more about the prototype or facilitate the navigation throughout the hi-fi prototype.

: The green rectangle that shows all the important /critical messages that justify a certain action or design.

: The blue rectangle normally found at the lower right corner helps the user navigate between **features** and **content pages.**

There are also "features content" pages for each part of the prototype at the beginning. All the features listed in the content pages are self-contained meaning that, the user can click on the hyperlink to look up a certain feature and start exploring how it works.
